Eric Lane

AI Automation & Digital Transformation Leader

Operator + consultant + hands-on builder for enterprise automation programs

SELECTED BUSINESS IMPACT

\$6.8M

consultant-led
automation savings

15+

automation opportunities
managed

600+

employees
represented

90%

operational inventory
reduction

EXECUTIVE PROFILE

Digital transformation and AI automation leader who can discover the problem, build the solution, and drive adoption. Known for standing up automation functions, converting operational friction into practical UiPath, OCR, macro, SQL, and Python solutions, and packaging delivery with playbooks, training, governance, and measurable business cases.

SIGNATURE VALUE

- | | |
|----------------------------|---|
| Consultant mindset | frames ambiguous work, runs discovery, defines ROI, writes LOEs, and builds roadmaps leaders can act on. |
| Builder credibility | codes and implements practical automation across UiPath, VBA/macros, SQL, Python, OCR, and reporting workflows. |
| Operator experience | understands queues, inventory pressure, SLA recovery, team enablement, governance, and sustained adoption. |

PROFESSIONAL EXPERIENCE

Elevance Health, formerly Anthem Inc.

AI and Automation Consultant

Nov 2024 to Present

- Created a new AI and automation consulting function for enterprise operations, covering discovery, prioritization, documentation, delivery, and adoption.
- Supported leaders and operational groups representing 600+ employees while managing a 15+ opportunity portfolio and quarterly automation roadmaps.
- Authored an operations automation playbook covering intake, value calculation, LOE templates, governance gates, launch readiness, retrospectives, and continuous improvement.
- Delivered \$6.8M in consultant-led savings, eliminated 140+ manual hours, and built UiPath enablement resources that reduced new developer onboarding by 20+ hours.

Manager, Payment Integrity

Nov 2023 to Nov 2024

- Built and scaled an operations team, hiring more than 95% of staff and creating the operating structure, policies, documentation, and coaching model.
- Implemented AI and automation improvements that reduced inventory by 90% and exceeded financial targets: \$18M vs. \$15M year one and \$8M vs. \$5M year two.

Software Engineer

Anthem Inc. / Elevance Health

- Built internal tools in .NET, C#, SQL, and Python to automate claims workflows, ETL recovery, diagnostics, operational support, and monitoring.

System Analyst

Anthem Inc. / Elevance Health

- Analyzed system issues, documented requirements, validated data flows, and improved operational reporting and support processes.
