PROFESSIONAL SUMMARY

Digital transformation and AI automation leader with operations experience building automation functions, scaling teams, and modernizing manual workflows through UiPath, OCR, SQL, Python, VBA, and process redesign. Combines consultant-level discovery, roadmap thinking, and stakeholder management with hands-on ability to build code, implement solutions, and drive adoption. Proven record creating operating models, enablement resources, and governance practices that improve adoption, reduce inventory, eliminate manual work, and exceed financial targets.

90%	\$26M	\$6.8M	140+
inventory reduction	delivered vs. \$20M targets	consultant-led savings	manual hours automated

CORE SKILLS

- Automation and AI: digital transformation, UiPath, RPA, intelligent automation, OCR, data extraction, workflow automation, process discovery, automation roadmap, bot development.
- Technical: Python, SQL, C#, .NET, VBA, Excel macros, automation scripting, ETL recovery, spreadsheet automation, diagnostics, operational reporting.
- Consulting and Leadership: transformation strategy, operating model design, requirements gathering, solution design, implementation documentation, governance, training enablement, Agile, SDLC.

PROFESSIONAL EXPERIENCE

Elevance Health, formerly Anthem Inc.

AI and Automation Consultant

Nov 2024 to Present

- Created a new AI and automation consulting function to identify, prioritize, document, and deliver automation opportunities across enterprise operations.
- Supported automation consulting needs for leaders and operational groups representing 600+ employees, translating team-level friction into scalable automation opportunities.
- Managed a 15+ opportunity automation portfolio and maintained quarterly automation roadmaps throughout consultant tenure.
- Authored an operations automation consulting playbook defining intake, discovery, value calculation, prioritization, LOE templates, governance gates, launch readiness, retrospectives, and continuous improvement standards.
- Delivered \$6.8M in consultant-led savings across two program years, including \$1.5M in year one and \$5.3M in year two.
- Eliminated 140+ hours of manual work by delivering UiPath, VBA/macro, spreadsheet, and script-based automation solutions.
- Led enterprise UiPath access proposal and developed training/support resources that reduced onboarding time for new UiPath developers by 20+ hours.

Manager, Payment Integrity

Nov 2023 to Nov 2024

- Built and scaled a healthcare operations team, hiring more than 95 percent of staff and creating the operating structure, policies, documentation, and coaching model.
- Implemented AI and automation improvements that reduced inventory by 90 percent and improved operational throughput.
- Exceeded financial targets by delivering \$18M versus a \$15M year-one target and \$8M versus a \$5M year-two target.

Software Engineer

Anthem Inc. / Elevance Health

- Built internal tools in .NET, C#, SQL, and Python to automate claims workflows, ETL recovery, system diagnostics, and operational support tasks.
- Reduced processing time and downtime with automation, monitoring, and diagnostics tools for high-volume operational systems.

System Analyst

Anthem Inc. / Elevance Health

- Supported business and technology teams by analyzing system issues, documenting requirements, validating data flows, and improving operational reporting and support processes.

EDUCATION

- Aspen University - M.S. in Information Systems, specialization in Enterprise Application Development
- ECPI University - Bachelor in Computer Science
- ECPI University - Associate Degree in Cyber and Network Security

CERTIFICATIONS

- Certified UiPath Developer; Decisions Certification
